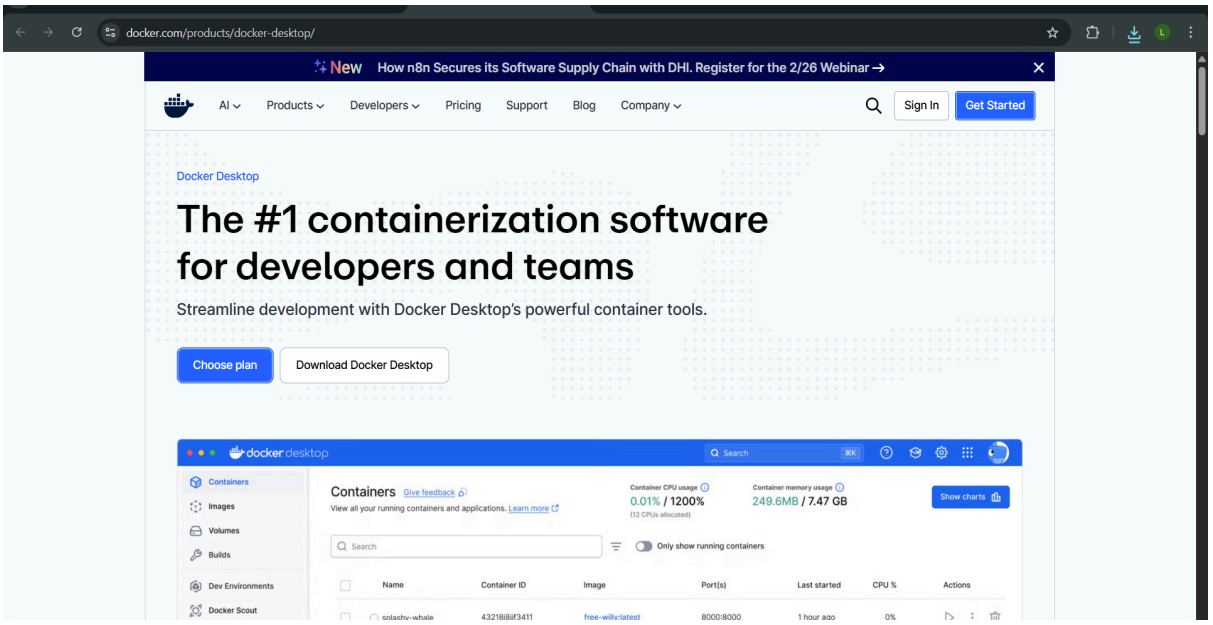
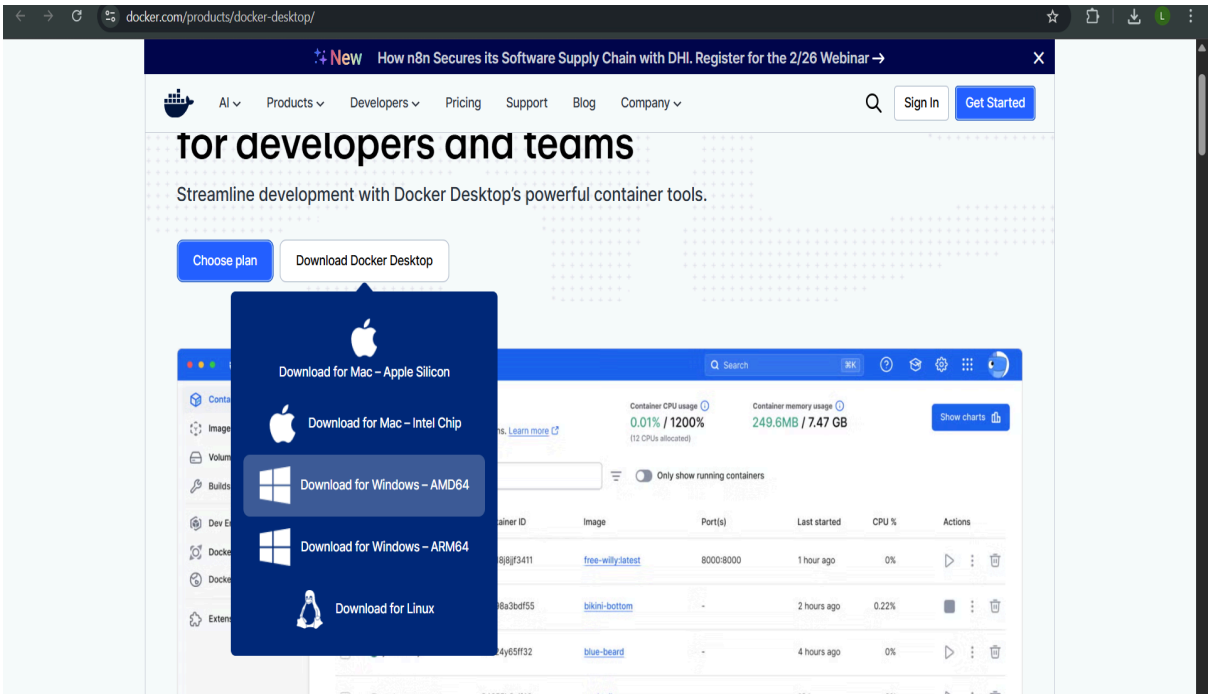
DEVOPS 02/03/2026

DOCKER site (open link below)
https://www.docker.com/products/docker-desktop/

This page will open



Click download docker desktop and Download windows - AMD64



Download and setup and restart

Then in your system search turn windows feature on or off => open this
Scroll and check

i) windows subsystem for linux

ii)virtual machine platform

Enable this both and click ok

Open docker and check it is installed completely using command (in windows docker open panna mattum tha docker engine run agum)

To check version

```
C:\Users\HP>docker --version
Docker version 29.2.1, build a5c7197
```

It give the extra information of version

```
C:\Users\HP>docker -v
Docker version 29.2.1, build a5c7197
```

This command gives extra informations

```
C:\Users\HP>docker info
Client:
 Version:    29.2.1
 Context:    desktop-linux
 Debug Mode: false
 Plugins:
  ai: Docker AI Agent - Ask Gordon (Docker Inc.)
    Version:  v1.18.0
    Path:     C:\Program Files\Docker\cli-plugins\docker-ai.exe
  buildx: Docker Buildx (Docker Inc.)
    Version:  v0.31.1-desktop.1
    Path:     C:\Program Files\Docker\cli-plugins\docker-buildx.exe
  compose: Docker Compose (Docker Inc.)
    Version:  v5.0.2
    Path:     C:\Program Files\Docker\cli-plugins\docker-compose.exe
  debug: Get a shell into any image or container (Docker Inc.)
    Version:  0.0.47
    Path:     C:\Program Files\Docker\cli-plugins\docker-debug.exe
  desktop: Docker Desktop commands (Docker Inc.)
    Version:  v0.3.0
    Path:     C:\Program Files\Docker\cli-plugins\docker-desktop.exe
  extension: Manages Docker extensions (Docker Inc.)
    Version:  v0.2.31
    Path:     C:\Program Files\Docker\cli-plugins\docker-extension.exe
  init: Creates Docker-related starter files for your project (Docker Inc.)
    Version:  v1.4.0
    Path:     C:\Program Files\Docker\cli-plugins\docker-init.exe
  mcp: Docker MCP Plugin (Docker Inc.)
```

Docker search gives the information which they kept in their interface

```
C:\Users\HP>docker search alphine

Based on ubuntu search official ok (irukuratha) pull pannalam
So ubuntu image will download in our local device

```
C:\Users\HP>docker pull ubuntu
Using default tag: latest
latest: Pulling from library/ubuntu
01d7766a2e4a: Pull complete
fd8cda969ed2: Download complete
Digest: sha256:d1e2e92c075e5ca139d51a140fff46f84315c0fdce203eab2807c7e495eff4f9
Status: Downloaded newer image for ubuntu:latest
docker.io/library/ubuntu:latest
```

To check the image is properly downloaded or not
cmd:

docker images

```
C:\Users\HP>docker images
                                                                    i Info →   U  In Use
IMAGE           ID             DISK USAGE   CONTENT SIZE   EXTRA
ubuntu:latest   d1e2e92c075e       119MB         31.7MB
```

Creating a new container
cmd:

docker create -d -- name (container name give) ubuntu

Or

docker create --name (container name give) ubuntu

```
C:\Users\HP>docker create --name siet ubuntu
5a02aeba6bf0dac79c0ce1be4ae50053c0b19408df73b242e08472c4da898395
```

This command used to show the containers created

```
C:\Users\HP>docker ps -a
CONTAINER ID   IMAGE     COMMAND       CREATED          STATUS    PORTS     NAMES
5a02aeba6bf0   ubuntu    "/bin/bash"   10 seconds ago   Created             siet
```

In status

i) created => create panniyachu but innum run pannala
ii) exited => not running

docker ps => shows only active container
docker ps -a => shows all container

docker start simply start (run) the container

```
C:\Users\HP>docker start siet
siet
```

docker stop => stop it

docker start => exited the container

```
C:\Users\HP>docker ps
CONTAINER ID   IMAGE     COMMAND   CREATED   STATUS    PORTS     NAMES

C:\Users\HP>docker ps -a
CONTAINER ID   IMAGE     COMMAND       CREATED         STATUS
            PORTS     NAMES
5a02aeba6bf0   ubuntu    "/bin/bash"   8 minutes ago   Exited (0) 2 mi
nutes ago             siet

C:\Users\HP>
```

The create and run a container

```
C:\Users\HP>docker run -d -it --name siet_devops ubuntu
7773071556dbcfec9be481fa21e2d51cd66f2462651c8cb3f800f3500eff46e7
```

This shows the container is successfully created

run => makes the containe create and run it
-d => daemon
-it => interactive terminal

Now it is running

```
C:\Users\HP>docker ps
CONTAINER ID   IMAGE     COMMAND       CREATED          STATUS
  PORTS     NAMES
7773071556db   ubuntu    "/bin/bash"   38 seconds ago   Up 38 seconds
            siet_devops
```

start cmd	run cmd
When we are creating -it not given so when we start it exited	But in this cmd we created using -it and run it so it is active

This command used to execute the container

docker exec -it siet_devops /bin/bash

exec => used to execute

```
C:\Users\HP>docker exec -it siet_devops /bin/bash
root@7773071556db:/#
```

Now we are inside ubuntu

Lets try ubuntu commands

First update

```
root@7773071556db:/# apt update -y
